A view of my private office. We maintain an office force of sufficient size and experience so that all orders will be handled immediately, and shipment made accurately on the same day your orders are received.

PLAY SAFE WITH FULWOOD'S GUARANTEE

I guarantee all of my plants to be exactly as described in this Catalog. Fresh pulled day order is received (where weather will permit). Plants pulled one at the time, counted and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

P. D. FULWOOD.

The above views show a portion of the office force writing up the daily orders.

Above picture shows a corner of seed testing and treating laboratories with Paul Fulwood, Jr., Pathologist in Charge. This assures you plants free from disease or insects.

FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

• Vegetables sold early in the season bring many times the price of those marketed several weeks later. Fulwood's Genuine Frost-Proof Cabbage plants produce full grown heads from two to three weeks before home-grown plants—and that's why they are real money-makers for the buyer.

• Here at Tifton, Georgia, where my plantation is located, the soil and climatic conditions are ideally suited for growing tough, hardy, healthy Cabbage plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight or ten weeks old they are extremely tough and hardy. In this condition they can be shipped to territory farther north and be planted in the open fields there a month or six weeks earlier than home-grown, hot-bed, or cold frame plants.

• These Frost-Proof Cabbage plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet or snow after they have been planted will not injure them unless the temperature gets below 18 to 20 degrees.

• Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, is the reason for their being able to make large, extra early crop—all ready for market during the time prices are high. Many unreliable growers are selling plants and calling them "Frost-Proof." In many instances these growers are located where they do not have frosts during the growing period and, therefore, the plants they are offering have never been subjected to the frosts.

**Ready September 1st
to June 1st**

EARLY JERSEY WAKEFIELD

Many market gardeners consider this the very best Cabbage grown. Its merits are many, among which are medium heads, for an early variety, small outside foliage, and uniformity of crop. Heads are white, solid and tender. This variety always brings a good price because of its earliness and it is therefore a good money-maker.

See price list on opposite page.

CHARLESTON WAKEFIELD

This Cabbage is much like the Jersey Wakefield. It has a much larger head, however, and is about ten days later. This is a desirable variety for shipping purposes as the heads are solid and firm. It is a strong favorite with growers for a main crop.

See price list on opposite page.

COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as the Jersey Wakefield. The stem is short, has large round and solid head with few outer leaves, of an upright growth. My stock of this popular variety is extra early, uniform and dependable.

See price list on opposite page.

**Use Order Blank
on page 13**

Ready September 1st
to June 1st

GOLDEN ACRE

Golden Acre is very similar to Copenhagen Market, being a few days earlier. The plants usually produce marketable heads in 65 to 70 days, which is as early as the Early Jersey Wakefield. It is a round headed variety for market gardeners and shippers.

See price list on page 4.

FERRY'S ROUND DUTCH

This variety has prominent heads, fairly large in relation to the size of the plants; very firm; when fully developed become six to six and one-half inches in diameter, five to five and one-half inches deep, and weigh about two and one-half pounds; rather deep in form, never distinctly flattened; interior very compact with very short, broad core; white with only a tinge of green; very crisp, tender and of good rich flavor. It is popular for the home and market garden.

See price list on page 4.

EARLY FLAT DUTCH

One of the oldest varieties. The head is usually large and flat, tender and fine grained. My strain of this Cabbage is of the best to be had. It is excellent for a tonnage crop because of the large heads.

See price list on page 4.

**Use Order Blank
on page 13**

Ready after March 15th until
June 15th

MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important mid-season yellows-resistant sort of Cabbage for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail.

See price list on page 4.

WISCONSIN ALL SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants out of standard All-Seasons grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities and it is well adapted for kraut and for winter use.

See price list on page 4.

GEORGIA BLUE STEM COLLARD PLANTS

Ready after March 15

These plants are very much like the Cabbage plants. They grow from two to three feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

See price list on page 4.

FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

•
Ready September 1st
to June 1st
•

Like all Genuine Fulwood Vegetable Plants, my Onion plants are grown, packed and shipped with the utmost care and precision. Plants are grown from the finest seed I can obtain. All seed is treated before planting and plants are sprayed during the growing

period and thus you are assured of good, healthy, strong plants. Because they are grown in the open field and are subject to light frosts during the growing period, they are Genuine Frost-Proof plants and will stand temperatures as low as 18 to 20 degrees above zero without injury. Onions grown from Fulwood's Genuine Frost-Proof Onion plants are also an excellent money crop, as they can be marketed at least two weeks in advance of Onions grown from sets and way ahead of Onions grown from seed. Furthermore, my plants will make much better Onions than those grown from sets, the Onions being larger and they do not run to seed. They will also keep much better when cured and stored.

My Onion plants should be set out the same time as my Cabbage plants, and you can order them for shipment at the same time. Prices are the same as for Cabbage plants and I will gladly mix an order, shipping part Onion plants and part Cabbage plants, if you desire.

See price list on opposite page.

Use Order Blanks on page 13

Varieties of Fulwood's Genuine Frost-Proof Onion Plants

YELLOW BERMUDA

This is the most widely grown of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market and is a large producer and a real money-maker. Whether grown for marketing or for your own table use, you can make no mistake in ordering this variety.

CRYSTAL WAX BERMUDA

Probably the best selling Bermuda Onion on the market because of its exceptionally attractive appearance. It has the same general appearance as the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

SPANISH VALENCIA (Or Sweet Spanish)

This variety can be grown in warm climates as successfully as the Bermuda varieties and much more successful in Northern climates. This is a large globe-shaped brownish yellow Onion of large size. The flesh is white, fine-grained, mild and sweet enough to be eaten like an apple. A good keeper and fine shipper when properly cured. Has been known to yield 1,200 bushels per acre.

Fulwood's Genuine Frost-Proof Onion plants are ready for shipment any time from September 1st to June 1st, following. All Onion plants are tied in bunches of 100 plants. Onion plants are priced the same as Cabbage plants, for all varieties, and should be set out the same time. I will gladly mix an order, shipping part Onion plants and part Cabbage plants, if you desire.

Fulwood's Spring Plants

(Not Frost-Proof)

Ready April 1st to June 1st

FULWOOD'S PORTO RICO SWEET POTATO PLANTS

Southerners who know their Yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who know Sweet Potatoes only as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has a deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder and keeps especially well. Northern markets and curing houses pay top prices for this variety.

Owing to a very dry summer Sweet Potato seed are very scarce. This causes the Potato plant crop to be short.

Prices by parcel post prepaid:

500 for \$2.00

FULWOOD'S EGGPLANT PLANTS

Black Beauty Variety—I specialize on this one variety because it has many merits. It holds its color especially well, grows very large, has good shape and is of unusually good quality. The Black Beauty variety is naturally early, and if you will grow it from my fine plants your crop will be just that much earlier.

Prices by parcel post prepaid:

Acres of tomato plants ready for shipping

FULWOOD'S SPRING PLANTS

Fulwood's Tomato Plants

Ready April 1st to June 15th

I ship more Tomato plants than any other grower, shipping them by millions to practically every state in the Union, to both large and small canning factories, truck farmers, gardeners, and to individuals who grow tomatoes for their own use. I have developed these varieties to a very high state and my plants are exceptionally rooted, large and stocky. They are all open field grown and are acclimated to outside temperatures and will start growing quickly and produce rich, red ripe Tomatoes much earlier and more surely than home-grown plants. Tomato plants are not frost-proof, however, and should not be ordered shipped until all danger of killing frost is passed. My Tomato plants are not perishable

See price list on opposite page.

and when packed as I pack them, in deep, damp moss, they will keep in good condition for several days.

In growing my Tomato plants I use the very finest Certified seed I can buy and plant only on new land. The plants are sprayed continuously to prevent disease, and when ready for shipment, plants are pulled one at a time and the roots are well wrapped in damp moss. These Tomato plants can be shipped succesfully to all parts of the United States.

Description of Varieties of Tomato Plants

Ready April 1st to June 15th

GREATER BALTIMORE is similar to the Stone, heavily productive and very valuable for canning. Fruits are scarlet-red, large, commonly weigh six ounces; deep but flat; smooth, very firm and solid.

MARGLOBE is a splendid type for earliness and uniformity; particularly valuable for shipping; definite disease-resistance recommends this type for use in sections infested with Fusarium Wilt and Nail-head Rust. Plants thrifty and heavily productive, of long bearing period. Fruits uniform deep scarlet; large; uniformly globe shaped; smooth, solid and of distinct quality.

BONNIE BEST is unexcelled as a general purpose Tomato; very valuable as a canning and shipping variety in northern sections. Fruits evenly colored bright deep scarlet-red; medium large; flattened globe shape; smooth and firm.

PRITCHARD (SCARLET TOPPER) is a very promising, heavily productive wilt-resistant variety for home and market garden, shipping and canning. Fruit large, globe shaped, scarlet and well colored about the stem end; flesh firm and of fine quality.

RUTGERS is highly recommended as a second early maturing variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

Prices by parcel post prepaid:

100 plants for	-----	\$.60
500 plants for	-----	2.00
1,000 plants for	-----	3.00

Prices by express collect:

Write for special prices on large quantities.

Use Order Blanks on page 13

Not Frost-Proof. Ready April 1st to June 1st

FULWOOD'S PEPPER PLANTS

CALIFORNIA WONDER VARIETY—This is an outstanding medium large variety for market garden and shipping. Plants vigorous, prolific. Fruits 4-lobed, chunky; very attractive, smooth, uniform and deep green, changing to bright crimson; flesh thicker than any other variety, sweet and mild.

PIMENTO VARIETY—Pre-eminently a canning variety; good also for home and market garden planting. Plants large, erect, prolific. Fruits heart-shaped, very smooth; color dark green, changing to bright crimson; flesh exceptionally thick, sweet and mild.

Prices by parcel post prepaid:

100 plants for	-----	\$.75
500 plants for	-----	2.00
1,000 plants for	-----	3.00

Prices by express collect:

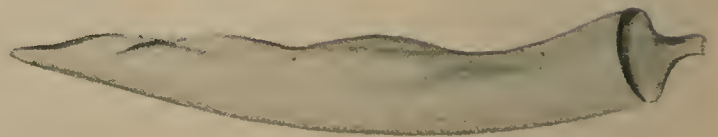

1,000 plants for	-----	\$2.50
5,000 and over	-----	2.00 per 1,000

FULWOOD'S HOT PEPPER PLANTS

LONG RED CAYENNE VARIETY—A favorite hot variety used largely for canning, and in pickles; also for drying. Plants large and productive. Fruits tapering, frequently twisted; very pungent; deep green changing to brilliant red.

HUNGARIAN YELLOW WAX VARIETY—A first early, hot sort, valuable for market gardeners and canners. Plants dwarf and prolific. Fruits medium slender, tapering, smooth and very pungent. Color waxy yellow changing to bright crimson at maturity.

Prices by parcel post prepaid:

50 plants for	---	\$.60
100 plants for	---	1.00
1,000 plants for	---	4.00

By express, **\$3.00** per 1,000, any quantity

PLANTING NOTES: When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread them out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out.

SPRAYING NOTES: For leaf-eating insects, such as green worms, use (1) one part of arsenate of lead and (3) three parts of hydrated lime. Dust heaviest where worms are most abundant. Repeat every ten days until worms are controlled.

For sucking insects, such as lice, use 12 ounces of nicotine sulphate to nine pounds of lime. Dust during the hot part of the day when the wind is not blowing.

For protection against disease, use bordeaux (four pounds copper sulphate, four pounds stone lime) to 50 gallons of water. It is necessary to get a complete coverage to stop the spread of fungi.

Use Order Blanks on page 13

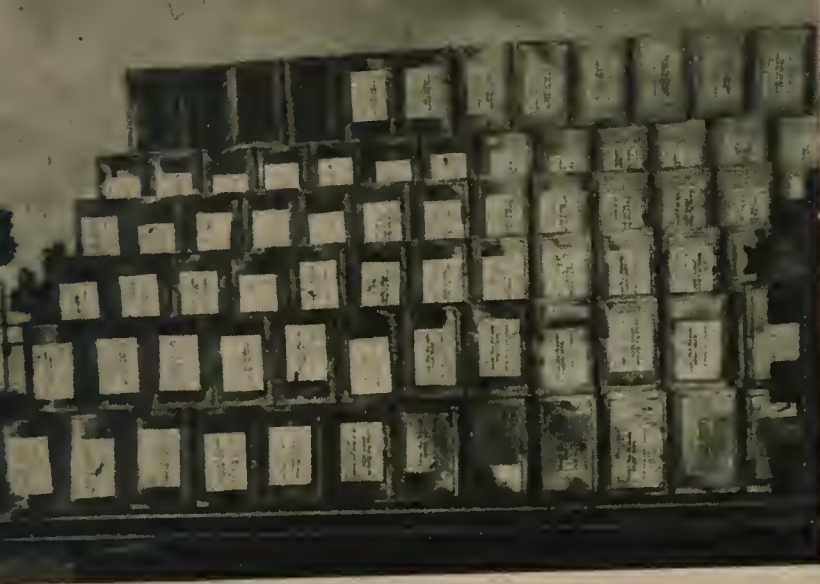

FACILITIES NECESSARY FOR SERVING YOU

A sixty horse-power Caterpillar tractor that we use in cleaning up new ground for planting to insure you of disease-free land.

A fleet of tractors preparing the seed bed.

Truck load of Cabbage Seed

We use the best quality seed that money can buy from the most outstanding companies in the United States. Our seed cost from two to three times as much as the average plant grower pays for seed.

Truck load of Onion Seed

The high-speed tractor seeders shown above can seed 50 acres per day. It takes thousands of dollars' worth of high-class equipment to successfully operate my vegetable plant plantation, which contains nearly 2,000 acres of the very finest plant-growing soil.

These are spraying scenes showing dusting machines in lower picture and spraying with liquid spray in the upper picture. I do everything possible to give you perfect plants and will make you a bumper crop.

The above machine, developed by the Tobacco By-Products Corp., is used by me, at great expense, to keep the plant fields free from aphids.

PACKING HOUSE

Largest Packing House for vegetable plants in the world, contains 45,000 sq. feet of floor space.

Packing scene in our warehouse. The Railway Express Company and United States Postoffice maintain branch offices in our warehouse during shipping season

We use the finest wire bound crates that money can buy to insure you of safe delivery.

J. S. Chandler,
Madison, Wisc.
May 21, 1938.

I want to thank you for your prompt shipment of Tomato plants. Just 4½ days from ordering, the plants had reached Madison and I call that service. I will keep you in mind for next year.

A. F. Sealey,
Vermilion, S. D.

I sure had wonderful luck last year with your Tomato plants. I picked as high as 240 bushels of Tomatoes per picking and had Tomatoes from July until October from 10,000 plants.

Tomatoes grown from Fulwood's Tomato plants arriving at a New Jersey factory. We not only ship plants but we make trips north to follow up these plants to see that they are everything we claim them to be. (Picture taken by Paul D. Fulwood, Jr.)

Cabbage produced from our plants being cut in Wisconsin. (Picture taken by Paul D. Fulwood, Jr.)

**Seth B. Jacobs,
Williamston, Mich.
May 23, 1938.**

Allow me to express my appreciation of the way you took care of my order for cabbage. The plants arrived in due time and I was highly pleased, both with the quality of the plants and the count. The cabbage was set immediately and now the field is a beautiful sight. Few plants are missing and they are making rapid growth. Last year I purchased from another firm of your state, but your plants are far superior to the ones I have previously set.

**C. M. Eddy,
Keystone, W. Va.
May 12, 1938.**

I received my order for plants from you this morning and your plants this year have been unusually good. The delivery service has been excellent. All my shipments of plants have arrived in good condition. I shall order again next spring.

From correspondence, we learned that this field produced 25 tons of Cabbage per acre. (Picture taken by Paul D. Fulwood, Jr.)

"Last year I had out some Flat Dutch Cabbage plants and we had Cabbage at least one month ahead of everybody else. Most heads weighed five and six pounds and lots weighed eight pounds. The ones the boy is holding in the enclosed photo weighed eight pounds. Your Onion plants are always extra large."

P. D. FULWOOD, Tifton, Ga.
